PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on experience delivering production software for a live healthcare client. Experienced in designing, developing, deploying, and maintaining responsive web applications using React.js, Node.js, Express.js, MongoDB, and Firebase. Skilled in RESTful API development, JWT authentication, database design, email automation, and responsive UI development. Strong ownership mindset with experience managing the complete software development lifecycle from client requirements to production deployment and post-launch support.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Web Design, Component-Based Architecture

Backend: Node.js, Express.js, RESTful APIs, CRUD Operations, JWT Authentication, Authorization, Middleware

Database: MongoDB, Mongoose, Firebase Realtime Database, MySQL

Automation & APIs: Nodemailer, Multer, PDF Processing, API Integration

Tools: Git, GitHub, Postman, VS Code

FREELANCE EXPERIENCE

Freelance Full-Stack Developer

2026 | Remote | [View Live Site](#)

Bihar Spine & Neuro Physio Care

React.js · JavaScript · Firebase · HTML5 · CSS3

- Designed, developed, deployed, and maintained a production healthcare website independently, managing the complete software development lifecycle from requirement gathering to post-deployment support.
- Collaborated directly with the client to understand business requirements, implement feedback, and deliver a responsive website aligned with clinic operations.
- Built a Firebase-powered administrative dashboard enabling clinic staff to manage appointment enquiries, patient feedback, and promotional content without developer assistance.
- Developed reusable React components and a mobile-first user interface to improve maintainability and ensure a consistent experience across desktop and mobile devices.
- Applied SEO best practices, production deployment, domain configuration, and ongoing maintenance while resolving deployment-related issues after launch.

SELECTED PROJECTS

Cravings — Full-Stack Food Ordering Platform

2026 | [View GitHub Repo](#)

React.js · Node.js · Express.js · MongoDB · JWT · Tailwind CSS

- Designed and developed a full-stack food ordering platform featuring restaurant discovery, cart management, checkout, and order processing.
- Built RESTful APIs using Node.js and Express.js, integrating a React frontend with MongoDB through Mongoose.
- Implemented JWT-based authentication and role-based authorization to secure customer, restaurant, and administrator workflows.
- Designed scalable MongoDB schemas and reusable React components to improve maintainability and support future feature expansion.

ApplyPilot — HR Email Automation Platform

2026 | [View GitHub Repo](#)

React.js · Node.js · Express.js · Nodemailer · Multer

- Developed a full-stack automation platform that extracts recruiter information from uploaded PDF documents and converts unstructured content into structured JSON.
- Implemented automated email delivery with dynamic resume attachments using Nodemailer and Gmail App Password authentication.
- Built backend workflows for file upload, data validation, duplicate detection, and recruiter outreach using Express.js and Multer.
- Created a responsive dashboard providing real-time email delivery status and workflow progress.

EDUCATION

B.Tech — Computer Science & Engineering

2023 – 2027

Rajiv Gandhi Proudhyogiki Vishwavidyalaya (RGPV), Bhopal | CGPA: 7.16

CERTIFICATIONS & ACHIEVEMENTS

- NPTEL — Programming in Java (IIT Kharagpur) — Elite Certificate with Gold Badge, 91% (Jan–Apr 2026).
- Selected for Coding Premier League (CPL) 2026 – Season 1, presenting a full-stack software project.
